

# Benedicta Aigbomian

SOFTWARE DEVELOPER • FRONTEND DEVELOPER

## PROFESSIONAL SUMMARY

frontend developer with hands-on experience building responsive, user-focused web applications using JavaScript, React, and modern web technologies. Demonstrated ability to transform design requirements into clean, maintainable code and deliver functional features. Seeking a junior web developer role where I can contribute to a development team, solve real-world problems, and continue learning best practices in a collaborative environment.

## PROJECTS

Real Estate Web Application L  
Technologies: React.js, Responsive Web Design, Component-based Architecture

- Built a responsive property listing platform using reusable React components, improving code maintainability and scalability.
- Designed and implemented a structured, intuitive interface that enhances property discovery and streamlines user navigation.
- Implemented scalable frontend architecture using React best practices for long-term maintainability and performance.

Bennie Accessories E-commerce Platform -  
accessories Technologies: React.js, Vite,  
Supabase (PostgreSQL, Auth, Storage),  
Tailwind CSS, Paystack API, Edge Functions

LIVE:  
[HTTPS://BENNIE-ACCESSORIES-STORE.VERCEL.APP](https://BENNIE-ACCESSORIES-STORE.VERCEL.APP)

- Built a production-ready e-commerce jewelry store with full-stack architecture supporting online sales and customer transactions.
- Implemented secure payment processing using Paystack API with Supabase Edge Functions for server-side payment verification.
- Developed an admin dashboard enabling inventory management, product uploads with image storage, and real-time order tracking.
- Designed responsive product catalog with intuitive filtering and search, optimized for mobile and desktop devices.

BABA MALLAM WALI GRASSROOTS MOVEMENT  
(BMW-GM) MEMBERSHIP PLATFORM

<https://www.bmwgm.com>

- Developed a scalable membership registration and management platform for a political grassroots movement supporting 20,000+ members in Yobe State, Nigeria.
- Architected a full-stack solution with public website and secure admin dashboard using Supabase authentication and row-level security (RLS) for data protection.
- Implemented location hierarchy system with dependent dropdowns (State → LGA → Ward → Polling Unit)...
